About

I am Khang, a Power Platform Developer with 3 years of experience. I help individuals and businesses digitize their processes with Power Apps, Power Automate, Power BI and Dataverse, and I build websites and web apps when needed.

Services

🟥 Power Apps solutions

Canvas and model-driven apps that replace spreadsheets and paperwork: data entry, approvals, catalog management, field data collection...

⚡ Automation with Power Automate

Automate approvals, notifications, data sync and repetitive tasks across your systems.

📊 Power BI reports & dashboards

Turn scattered data into clear dashboards to track revenue, operations and performance.

🔗 Dataverse, integration & governance

Dataverse data design, connecting existing systems and delivering solutions with proper ALM.

🌐 Websites & landing pages

Additional service: company sites, landing pages and fast, SEO-ready blogs.

🧩 Custom web apps

Additional service: when needs go beyond low-code, I build a dedicated web application.

Packages and reference prices

Discovery & consulting A session to understand your current process · A proposed solution and roadmap · A detailed quote before anything starts	**20 - 40 USD**
Project build Design and development within the agreed scope · Testing together before real use · Handover and usage guidance	**From 120 USD (small app or flow)**
Maintenance & support Bug fixes and small adjustments · User support after handover · Scope stated clearly in the quote	**20 - 40 USD/month**

Prices above are reference figures for small jobs. Larger projects are quoted by scope of work, and a specific quote is sent after we talk.

Selected projects

Client details are omitted.

🏷️ Barcode-based asset inventory and management system (Power Platform)

A solution made of several apps and automated flows: scan barcodes to find and count assets, compare counts with system data, manage photos, run multi-level approvals and report in Power BI.

Power Apps · Power Automate · SharePoint · Power BI · Microsoft 365

📑 Contract and document management system (Power Apps)

A set of Power Apps managing the lifecycle of contracts and related documents: template-based drafting, configurable approvals, delegation and partner profiles. Bilingual Vietnamese - English interface.

Power Apps · Power Fx · SharePoint · Microsoft 365

🧱 Contractor management and approval app (Power Apps)

A Power Apps app (desktop and mobile) for internal staff to review contractor submissions: multi-level approval, approver delegation and history tracking, running on SharePoint data.

Power Apps · Power Fx · Power Automate · SharePoint

👥 HR management app: location-based attendance with photos and payroll

An HR system on Power Platform: employee records, check-in/out by location with a confirmation photo, payroll from working hours, overtime and allowances, automated approvals and reminders, and Power BI reporting.

Power Apps · Power Automate · SharePoint · Power BI

👨‍💼 New-employee onboarding automation (Power Automate)

A set of Power Automate flows that coordinate preparing for a new employee: notifying the right teams, issuing a computer, an email account and a uniform, with an approval for each issuance and reminders when something is not handled.

Power Automate · Microsoft 365

Tech stack

Power Apps · Power Automate · Power BI · Dataverse · Power Fx · DAX · SharePoint · Microsoft Teams · TypeScript · Node.js · SQL · KNIME (basic)

How I work

1. **Discuss your needs.** We clarify goals, users and the scope of work.
2. **Proposal & quote.** We agree on the solution, timeline and cost before starting.
3. **Build & demo.** Work is delivered in stages with demos so you can give feedback early.
4. **Delivery & support.** Deployment, handover guidance and support after launch.
